- Landscape Remodels

Creating Self Sufficiency through Your Vegetable Garden

Having to live out of your garden is a hard time to learn how to grow a garden! It is better to master the art of gardening now. This spring, with the itch to get outside and with a focus on self-sufficiency, we have decided to focus more on our garden areas. Gardening provides food that is organic, healthy, and fun to grow! Gardens can provide a supply of economical and flavorful food! Gardening in garden boxes can help provide ease in gardening. Garden boxes warm up the soil and provide for faster growing veggies. They also add order to a landscape and can be a beautiful addition to your home. We would love to give you a free quote on your garden boxes! Call **745-6853**.

Invest in Your Home

Now is the time to add value to your home by enhancing your landscaping. We all agree that news about the economy has been somewhat volatile. If you are looking to sell your home in this troubled economy, improving your landscape can provide the edge you are looking for against other homes in the area. If you are simply planning on spending more time at home, it is also important to be looking for ways to improve your property value for the long term. Investing in your landscape can not only give you enjoyment, but a greater return on your property.

Consider improvements such as:

- Resolving problem areas by landscaping spots that detract from the beauty of your home.
- Simply redoing shrub or flower beds can add instantly to the curb appeal of your home.
- Creating useable outdoor living spaces.
- Landscaping to accentuate the focal points of your home.

We would love to help you add value and enjoyment to your property. Call **745-6853** for a free quote!
